

200 ULTRA

HANDHELD THERMAL INKJET PRINTER

Cortex-A9 quad
core CPU

Direct editing,
no need to connect
to a computer

Support variable
database

600DPI High
resolution printing

Light weight

Word Height Range 2-12.7mm adjustable

The maximum character of inkjet printer is 12.7mm,
and the font height within this range can be realized.

Small Size

Be easy to carry about

Lightweight design,easy to carry,code spraying at any time

Features

F-TRON

Product Parameter

Print Head	Thermal inkjet 2.5
CPU	Quad core 1.4GHz
Operation System	Linux
Print Distance	Best quality with 2-5mm
Interface	USB, Photocell
Print Resolution	600dpi Maximum
Weight	GW 0.7KG
Dimension	225*135*110mm
Battery	2600mAh @ DC16.8V
Ink Type	Water-based/42ml, Solvent/42ml
Material of Printer	ABS+PC
Print Height	2-12.7mm
Language	Chinese, English, Japanese, Turkish, Arabic, Korean, Spanish, Russia, French, Portuguese, Italian, ect
Adapter	AC input 100~240V; DC output 16.8V/2A
Ink Color	Black, White, Red, Yellow, Blue, Green, Invisible, UV
Print Content	Chinese, English, NumberS, Symbols, QR code, Bar code, Pictures, Dates, Counter
Print Media	Boards, Carton, Stone, Pipe, Cable, Metal, Plastic, Electronic, Automotive parts
Operational Environment	Temperature 0-45℃ (The best 20-30℃) Humidity 40%-60%Rh

Product Details

NO.1 Panel application

It can realize multi-functional operation.
The photocell interface can realize the
production line coding and improve
the production efficiency.

Intelligent touch system ***NO.2***

New and updated inkjet engine, low
cost and high quality printing performance.
With HP original imported ink, suitable
for all kinds of materials and industries.

NO.3 Large capacity battery

Long-lasting standby with large
capacity battery. Long-term work
of coding can be realized,
frequent charging can be avoided.

Capacity storage ***NO.4***

Internal mass storage,
Edit the file and data on machine
any time, without connecting PC

No.5 Quick dry ink cartridge

After using the machine, please take out the ink cartridge from the machine and put it in the clip of the ink cartridge to avoid damaging the ink cartridge.

Coding synchronous wheel ***No.6***

The synchronous encoder is for precise coding, it can prevent shaking or uneven motion from causing coding failure.

No.7 Printer handle

The handle of the inkjet printer has a double-sided three-layer concave texture design, which is conducive to holding firmly and not easy to fall off.

Coding button ***No.8***

When the display interface setting operation is completed, please press the red button when starting to print.

USB Driver
Touch Pen
